

Wesbrook Community Centre- September 30, 2017

| Guiding Principles | | COMMENTS | |
|--------------------|---|---|---|
| Principle 1 | 1) | 2) | 3) |
| | Extremely important | | Less attention on generating wealth and more on faculty, staff and student needs |
| Principle 2 | 1) | 2) | 3) |
| | Noise and traffic, access and safety are important! | The new neighbourhood should balance the stadium and residential lifestyle | Implement small urban projects (vegetation, brightness) that have proven to improve mental health and reduce stress and contribute to being a great neighbour |
| | Extremely important | Protect natural and architectural assets, i.e. the old main library | Affordable home ownership is critical! A number of units subsidised and reserved for staff and faculty |
| | | Hawthorn Neighborhood features should be carried over to the Stadium N. | A shuttle service is necessary |
| | | | Create and develop a UBC neighbourhood shuttle |
| | | | Provide sufficient street light to ensure safety |
| | | | On campus shuttle would be awesome! |
| Principle 3 | 1) | 2) | 3) |
| | Not important | Dedicated neighbourhood for faculty, staff, and residents | Opening a small-grant initiative for projects and research that benefits the community and involves the critical mass at UBC |
| | Very important for the stadium | | Create a space for supporting mental health, i.e. space for learning life skills and building confidence |
| Principle 4 | 1) | 2) | 3) |
| | Very important for the stadium | Make promise to keep rodo woods area - don't chop down the trees on either side of the greenway | The thunderbird stadium should stay where it is as a heritage facility |
| | very important | | |
| Principle 5 | 1) | 2) | 3) |

| | | | |
|-------------|--|--|--|
| | Give money to cultural programs and venues on campus | | Second floor commercial space |
| | library | | |
| | Very important | | |
| Principle 6 | 1) | 2) | 3) |
| | Very important | Affordable housing for students as well as staff | Affordable hotels for parents visiting students |
| | Extremely important | | Guest suites for families in the new building and common space |
| | Very important | | |
| | Very important | | |
| Principle 7 | 1) | 2) | 3) |
| | Very strongly agree | | More community gardens and green space for mental health and wellbeing |
| | | | Do not destroy forest! |
| | | | Very important (bullet 3) |
| Principle 8 | 1) | 2) | 3) |
| | | | More bus stops on East Mall and Stadium Rd |
| | | | Take into account the needs of the handicapped for vehicle access and parking |
| | | | Make enough parking for the new neighbourhood |
| | | | |
| Principle 9 | 1) | 2) | 3) |
| | | | Designing for adaptation and to changing climate involves not only infrastructure and technology but also human behaviour. |
| | | | Save some space for the community to determine future use |
| | | | Save space for rapid transit station |

Other Towers COMMENTS

Case studies (local)

external construction in the name of best practices at UBC

| | |
|--------------------------|--|
| Big Idea | |
| | House refugees |
| | Development footprint not greater than 60% |
| | Minimize traffic congestions (develop local community shuttle service) |
| | Extend underground skytrain to Uni BLDV |
| | This is a blunder: See UC Davis or UCSB for what to do when all the young talented faculty leave |
| | Focus on infrastructure: transportation and amenities |
| | Design for mental health, a changing climate, and compassion and solidarity |
| | Shared garden space/rooftop green spaces for all to access |
| | Keep stadium where it is, and build residences around it. Improve traffic. |
| | Improve traffic |
| Getting Around - Transit | |
| | Why not a UBC specific system? Smaller shuttles, longer hours |

| MAP COMMENTS | Location |
|--|-----------------------------------|
| Walkable shops | Wesbrook Village |
| Love the narrow roads that make for a walkable and close knit community | Wesbrook Village |
| I love walking the circuit east mall / 16th / SW Marine / around the stadium with my dog | East Mall / 16th / SW Marine Dr. |
| The stadium should remain where it is right now as a landmark / heritage facility. Some upgrade would be good | Stadium |
| Please keep the forest!! | Stadium |
| We are fortunate to have a small forest inside the neighbourhood. Please keep it! | Rhododendron Woods |
| Walkway going through the Rose Garden allows community common space / opportunity for neighbours to gather on porches / the walkways + promote informal social contact. Very neighborhood feel | Rose Garden |
| Needs roads wide enough for passing traffic and service vehicles | Wesbrook Village |
| Host a design competition | Stadium Neighborhood |
| Construction sites are too messy | Wesbrook Village |
| Affordability for faculty is a crisis! | Stadium Neighborhood |
| Better street illumination needed on SW Marine Dr - Dark and dangerous | SW Marine Dr |
| There is no municipal right to vote - we have no say except as a complaint! | UBC Farm |
| It's nice but is it necessary? It comes at the expense of people living further away and higher rental prices | UBC Farm |
| We need more neighbourhood shuttles. We are getting older and less able to walk everywhere! | UBC Farm |
| The construction site should be cleaned up | Student Union Blvd / Wesbrook Ave |
| Gated communities make space exclusionary even for people in the very neighborhood | Hampton Place |
| Not enough commercial space for creative commercial activities | Wesbrook Village |
| Stop sign needs enforcement (Shrum Lane) | Wesbrook Village (Shrum Lane) |
| Need place for teens to play sports (Vacant parcel working well) | Wesbrook Village |
| Construction site should be cleaned up if there is no future development | Wesbrook Village |
| Traffic plan is a disaster - the circles are going to get us all killed | W 16th |

| | |
|--|--------------------------------|
| With more residents there will be more pressure on 16th ave and Wesbrook roundabout. How about some consideration of 1 way traffic systems | 16th / Wesbrook |
| There is a lot of greenspace but neighborhood structure lends itself to coming home and closing doors/going inside. Feels commercial + cold / in contrast to hawthorn and Main Mall walking / gathering spaces | Wesbrook Village |
| The roundabouts are very dangerous | Wesbrook / 16th Ave roundabout |
| Keep stadium where it is and update around stadium | Stadium Neighborhood |
| Provide more recreational field that are useful to the community and university (not sold to outside organizations i.e. Whitecaps) | |
| The neighborhood is getting too tight with building/condos please do it smart way, keep the forest and space between condos | Stadium Neighborhood |
| The parks in wesbrook are much more functional/kid appropriate. The hawthorn parks are strangely constructed /lack swings | Wesbrook / Hawthorne |
| Bring rapid transit to Uni Blvd (with options to extend it across UBC) | West Mall |
| The traffic in this roundabout is very congested when there are events | W 16th / Wesbrook |
| How to mitigate noises of varsity games & residential living | Stadium Neighborhood |
| The transportation is terrible for residents - we cannot walk to the loop to get out of here | East Campus |
| When are you shutting down the university and just turning it into condos? | UBC Farm (forest) |
| There are too many sports venues now! Let the indigenous interests ride on all the decisions | Stadium |
| | |
| Works well | |
| Misc. | |
| Needs improvement | |

Old Barn Community Centre- October 3, 2017

| Guiding Principles | COMMENTS | | |
|--------------------|---|--|---|
| Principle 1 | 1) | 2) | 3) |
| | Steward of the land. Building is not stewardship | | housing must be affordable by faculty and staff, not just wealthy investors |
| | We need to remember social sustainability consider reducing proposed density so there is more green space. Stadium neighborhood density is too high for this area and will not leave enough room for green space per person | | Sustainable - affordable housing and variety o housing units for households |
| | | | Affordable, large enough apartments for faculty (3 bedrooms) to avoid losing talent through housing problems |
| | | | Don't drive out present residents in favour of future development |
| Principle 2 | 1) | 2) | 3) |
| | Minimize noise and traffic is key | Systems noise control for both interior and exterior liveability | The current position and orientation of Thunderbird Stadium is optimal for noise since most goes south and west where there are no residents. This could be maintained on future plan |
| | This area may feel separate from Hawthorn and the Village in other words not knit together | | Build with wood (like Brock Commons) clean and quiet |
| | | | Any new stadium must address noise penetration to residential neighbourhood |
| | | | Ensure traffic control and public transit provided |
| | | | Limit construction noise to normal working hours to minimize stress on surrounding areas |

| | | | |
|-------------|---|---|--|
| | | | No shops. We already have the village and south campus. Give this place more peace and quiet and deep thinking time for the residents |
| Principle 3 | 1) | 2) | 3) |
| | | Surely a complete campus community needs to include areas for enjoyment of nature | More 3 bedroom units for faculty and staff |
| | | Families can't fit in 2 bedrooms or less | Quality of life = enough green space/person. Build more co-housing units for faculty and staff. We are very happy with our unit! Also helps create a great neighbourhood |
| | | Retain heritage elements of stadium and Tbird columns | Ban property speculation on campus (largetown in Wesbrook are half empty from this - does not contribute to a vibrant community) |
| | | Eatery for athletes/supporters/parents picking up kids | Non profit housing projects and less market housing, coops, cohousing, Abbey field |
| | | Childday care | Housing priority for UBC faculty, students, and residents |
| | | Integrated public transit | Needs based, priority to campus users |
| | | Is there a place to include more playgrounds and greenspace or children and young families? | Consider doing away with 'market' housing. If for sale, sell at reasonable prices with priority to staff and faculty and students |
| Principle 4 | 1) | 2) | 3) |
| | Exceptionally important | | Save the tree cover as much as possible |
| | Very important. We teach place-based learning to our education students | | Keep as many trees and forest spaces on campus |

| | | | |
|-------------|--|--|---|
| | | | No concrete. Use waterwise plantation principles when planning parks - they don't require irrigation |
| | | | Save the trees |
| Principle 5 | 1) | 2) | 3) |
| | | | Need to include more natural outdoor learning spaces |
| | | | Integrate and blend boundaries between living spaces and outdoor spaces |
| | | | Hawthorn is a model neighbourhood has enough space for living |
| Principle 6 | 1) | 2) | 3) |
| | The most important | Housing priority for staff and faculty - very important for UBC to attract the best talent, however it has to pay for the stadium... | |
| | How to be affordable | Reducing housing costs may only truly be possible by ignoring market prices for property on campus and actually selling at reasonable prices | |
| | Extremely important | | |
| Principle 7 | 1) | 2) | 3) |
| | Very important given the realities of climate change | Trees | Many of the plantations that UBC properties have made are completely not sustainable without huge amounts of irrigation |
| | Very NB | Where is indigenous recognition and perspectives? | Need to change to water-wise plantations and make better use of shade trees |
| | | Missing a lot of trees | |
| Principle 8 | 1) | 2) | 3) |
| | Super NB | More community gardens | The stadium neighborhood is an ideal location for a second transit hub on campus. The main transit hub is relatively far for all neighborhoods at this end. Strongly recommended! |

| | | | |
|-------------|--|---|---|
| | Very important | How transport systems affect existing neighbourhoods | More cross campus options - it takes longer to bus to transit center than to walk. But it's too far |
| | The biking and walking prioritizing is great | Make sure that the Broadway Corridor Train makes its way to UBC | make transit system |
| | Extremely important | With transit options comes more need for bike parking | Efficient public transport to stadium - parking underneath the stadium |
| | | More plants and trees | |
| Principle 9 | 1) | 2) | 3) |
| | Very important, but hard to implement | | Include electrical charging station |
| | Not important to me - self driving vehicles | | Design durable, flexible and adaptable buildings (eg. Removeable wall, see Toronto Waterfront) |

Other towers

COMMENTS

| | | | |
|----------------|--|--|--|
| Green space | | | |
| | Rhodo will be impacted by 2500 more people | | |
| | Rhodo woods will become a more isolated habitat area as the neighborhood is developed | | |
| Getting Around | | | |
| | Cycling and pedestrian routes between Norma Rose School from Hawthorne Neighbourhood need to be safer | | |
| | Cycling through fields areas is challenging with lack of accessible curbs, lighting, and bumpy and unsafe sidewalks | | |
| Big Idea | | | |
| | Give developers more total square footage to build if they would build 3+ bedroom units (1600 square feet or more) | | |
| | Could we go back to those first assumptions regarding the Land Use Plan "Does UBC need to keep growing" as Santa Ono said last week | | |
| | Stadium feels useless; parking creates too much wasted space | | |
| | Think waterwise plantations to reduce water use / protect any trees | | |
| | From faculty retention perspective, the new space should offer "larger" units for faculty members/families. This should be for sale, ideally more than 3 bedroom | | |
| | Rental and market housing that is affordable for regular staff/faculty | | |

| |
|---|
| <p>This is a university and students needs should take priority. Building designated student residences as well as a mix of other residences would help the area feel more connected to campus. Having students live nearby would also increase the use of the stadium itself</p> |
| <p>Slow down development. It's eating up forests</p> |
| <p>Agreed: Slow down development. It's eating up forests</p> |
| <p>Have ample underground parking</p> |
| <p>Control noise and don't destroy trees</p> |
| <p>Protect the Rhododendron woods from damage, overcrowding and undue noise</p> |
| <p>Noise control and safety both during and after construction</p> |
| <p>Noise isn't our biggest concern because we live in a neighborhood full of children</p> |
| <p>Do not destroy Rhodo woods</p> |
| <p>Space for those with mental challenges and outreach workers or volunteers (especially for international students)</p> |
| <p>Please consider accommodation options for visiting parents or family members of international students</p> |
| <p>Retain the stadium in the same location to preserve the green space next to the Botanical gardens and protect existing views</p> |
| <p>Consider underground parking and retain land for future rapid transit to reduce traffic (exp. During events)</p> |
| <p>Misc.</p> |
| <p>This is incredible ugly - please avoid concrete mass on campus</p> |

| MAP COMMENTS | Location |
|--|------------------------------------|
| Nice access to other parts of campus via Main Mall | UBC Farm |
| Can these farm plots be relocated to larger UBC farm near wesbrook to make room for more residences/study spaces? | UBC Farm |
| Walking path connects us to UBC! We feel part of campus (wesbrook is cut off) | UBC Farm |
| Inviting open space for gathering / pelasant pedestrian malls | UBC Farm |
| Farmers market and UBC Farm are fantastic for the community | UBC Farm |
| Any new parking for the new stadium should be underground if possible to allow more space for housing/green space | UBC Farm |
| All our friends and kids love Rhodedendron | Rhodedendron Woods |
| Main mall pedestrian path is excellent! | Main Mall |
| Please don't touch those trees | Ropes course |
| If there are student residences being built, can a community shuttle be incorporated to bring them closer to academic buildings? Costs could be incorporated into residence fees | UBC Farm |
| Please ensure any student residences built here incorporate lots of co-working study space for students since there is a distance between the residences and the libraries | UBC Farm |
| Kids and family love the skate park | Skatepark |
| Missing a lot | UEL |
| The new pool is amazing | University Blvd |
| There's a BBQ once a year | Hampton Place by 16th Ave |
| Reading room for kids and parents society | W 16th / Wesbrook mid neighborhood |
| Students going to see games and concerts are too noisy | Hawthorne |
| Students walking along Thunderbird Fridya and Saturday are very loud. Can they be routed elsewhere? | UBC Farm |
| Need to have pedestrian-activated crosswalk for school children across East Mall and speed bumps | UBC Farm |
| Speed bumps needed in block of East Mall between Thunderbird and Eagles drive (dangerous) | UBC Farm |
| Residential buildings facing major street of key campus facilities | UBC Farm |
| Access for school children from Hawthorne neighborhood to Rose Point school needs to be much safer | UBC Farm |
| Please retain this forest in its natural state | Ropes course |
| Please keep the rhodedendron forest | Rhodedendron Woods |
| Don't cut down the trees | Rhodedendron Woods |
| No more high rises pelase | Stadium Neighbourhood |

| | |
|---|---|
| The current footprint of the stadium is being underutilized. The stands are very far away from the field, and while nice it seems to be a waste. Making sure the stadium uses its footprint effeciently will help with other space concerns | |
| With sadium redesign, please factor in the currently fans have to stare directly into the sun as it sets. With the redesign if it can help the fants watch easier | |
| Move parking underground | Stadium |
| Needs better yeld sign | 16th / SW Marine Dr |
| More residents may bring unbalance in UNCA area | Stadium Neighbourhood |
| Noisy fans on building 24/7! Cant open windows in highrise | Wesbrook Mall / Thunderbird Blvd |
| Building infrastrucutre could be better | Wesbrook Mall / Thunderbird Blvd |
| Pave this path! It's a mudpuddle and main access point | Path between U Hill highschool / Wesbrook building |
| | |
| Works well | |
| Needs improvement | |

Irving K Barber- October 5, 2017

| Irving K Barber- October 5, 2017 | | | |
|----------------------------------|----|--|--|
| Guiding Principles | | COMMENTS | |
| Principle 1 | 1) | 2) | 3) |
| | | | Develop a set of suust. Metrics with which to monitor community performance wenchwork and apply for awards |
| | | | Real effort for sustainable water infrastructure - no more once through water features |
| | | | (x2) Real effort for sustainable water infrastructure - no more once through water features |
| | | | Include for own housing options for faculty + staff. UBC will attract and retain high level folks if they can see a longer-term future here |
| | | | Faculy and staff co-housing would be the BEST |
| | | | Actions identified don't include any environmental sustainability. This doesn't fit well with the principle identified |
| | | | With long-lived build architecture, don't go too trendy or glassy |
| Principle 2 | 1) | 2) | 3) |
| | | Pets! In an area considered to be so liveable and innovative, the inclusion of pets as a part of a healthy social life seems appropriate. Make sure to reform policy to allow pets to live on campus | Accessible play and park spaces. Sadly, woodchips are not accessible. We have lots of those. Let's add an accessible play space and green space for all. |

| | | | |
|-------------|----|--|---|
| | | Holiday events and decoration - UBC must be the only neighborhood in that doesn't decorate for winter holidays | |
| Principle 3 | 1) | 2) | 3) |
| | | Donors are willing to pay and push for varsity excellences, but a complete campus community needs to provide for the vast majority of the campus community who aren't varsity. | Realizing the principle should foster active living, learning and playing among all community members w' accessible (to no cost) playing fields, etc. |
| | | | Faculty and staff co-housing to own, green college style (people who work at UBC including faculty can't afford to buy a house) |
| Principle 4 | 1) | 2) | 3) |
| | | Musqueam (SP?) | Use the botanical gardens as a master site of interest and for design guidelines |
| | | Save more green space | Remember that we are on musqueam land, highlighted through signs, info, culturally sensitive design, and art and inclusion of this group |
| Principle 5 | 1) | 2) | 3) |
| | | | Keep the ropes course to continue to promote interaction, collaboration, and dialogue as well as community engagement |
| | | | Remove the ropes course - severe damage to trees and lack of respect for the environment |
| | | | Support and build innovative / interdisciplinary working spaces |

| | | | |
|-------------|---|--|--|
| | | | Indoor / outdoor collaboration and academic space. Sponsored by a particular faculty? |
| Principle 6 | 1) | 2) | 3) |
| | Increasing density and lowering square footage per person can help make the rentals and sale of properties more affordable | | As a grad student, it sure would be nice to be able to imagine moving onto campus following graduation |
| | Living at campus is a big priority for me. I have a 5-person house and work at UBC full time. Currently commute is 1 hour/15 min by bus and skytrain. I would certainly try to rent at campus if it was no more than \$200-300 more than my current place | | Yes! All members, including staff and faculty and students . Will there be some mixed/ student /social housing |
| Principle 7 | 1) | 2) | 3) |
| | | There are insufficient green spaces in Wesbrook | Create spaces that actively contribute to enhancing biodiversity |
| | | | Provide for a lot of urban agriculture opportunities |
| Principle 8 | 1) | 2) | 3) |
| | | People with handicaps | |
| | | Build-in facilities for cycling, storage, changerooms, bike paths, etc. having focus on cycling friendly infrastructure may significantly help promote cycling | |
| | | Parking is already difficult in the area. Think about handicapped needs | |
| Principle 9 | 1) | 2) | 3) |
| | | | Keep up with car share parking |
| | | | Covered bike parking / safe and well-marked bike lanes - especially on routes to schools, childcare, community centres |
| | | | On campus bike share |

| | | |
|--|--|-----------------------------|
| | | Yes! (on campus bike share) |
|--|--|-----------------------------|

**Other
Towers**

COMMENTS

Big Idea

| |
|--|
| Has to meet the needs of the UBC community; affordable, accessible, flexible |
| Animal sanctuary with goats |
| Underground parking so residents have the change to enjoy the streets |
| Rooftop garden with a fountain |
| Faculty/staff co-housing (owned) |
| Interactive public spaces that engage |
| A zipline that goes down to the beach |
| Public fountains/drinking water |

| MAP COMMENTS | Location |
|---|---------------------------------|
| this community works in ways few others do | Acadia (south of tower) |
| Please make this path more accessible - all the families going to school (winter-friendly gravel, and flattened would be great! | Acadia (south of tower) |
| I love the green on campus (lots of trees, lots of walkways, beautiful sceneries, views of the ocean, etc. | Acadia (south of tower) |
| Increase connectivity (neighborhood and farm) | UBC Farm forest |
| An amazing place | UBC Farm |
| Keep forest | Stadium Neighbourhood |
| Integrate strongly between stadium/Botanical gardens (more attention to the botanical gardens) | Botanical gardens |
| Bike lanes are a must for commuters and students | Stadium Neighbourhood |
| Please retain, or improve, the loop around the stadium for cycling, and cycling races/training | East mall / Surrounding stadium |
| Keep this forest, add paths through it | Ropes course |
| Safe crossing to wesbrook, especially for children | Ropes course |
| Keep the forest! Tree area works well | Ropes course |
| Great spot for a walk - more little forest trails please | Asian studies building |
| Orchard commons work really well combining work and live and amenities | Orchard commons |
| Playing field and free gym | Marine drive Res |
| | |
| The community here is a great location to bring grad students and residents together | Old barn community centre |
| This small piece of forest gives hope in humanity | Rhododendron woods |
| Fully covered paths from exchange to major buildings would be appreciated | Old Sub |
| This is an awaiting building, wish it was more open to the rest of the campus | Iona Building |
| Zero cards in entire neighbourhood, only for walking and bikes (underground parking) | Stadium Neighbourhood |
| Congested 4-way stops during rush hour (morning) | Agronomy Rd |

| | |
|--|----------------------------|
| Stop sign at Osoyoos Crse and Thunderbird would be great | Acadia (south of tower) |
| Thunderbird b/w Wesbrook and Osoyoos cres is very dangerous for cyclists. Many families cycyle here. A continued bike lane would be awesome. NRP School as 830 kids this year and daycares | Acadia (south of tower) |
| X2 Add a foot path connecting hawthorn and rhododendron to Pacific spirit park | UBC Farm forest |
| Add trails here (far away fromhighway) | UBC Farm forest |
| Keep forest | UBC Farm forest |
| Safer biking path to Norma Rose Point | East Mall |
| Cross light for kids commuting to school every day, pelase | East Mall by soccer fields |
| Private sleeping spots for students who life of campus so they can rest between classes so they don't fall asleep in class | General |
| Bike lane disappears mid-way. Where are the bikers supposed to go after the lane disappears, left in the middle of the road? | Wesbrook Mall / Agronomy |
| Way too much non-faculty/staff ownership | Wesbrook |
| This turn about is so dangerous for bikers (bike lanes just disappear) | Wesbrook / 16th Ave |
| A complete joke in the face of student affordability | Wesbrook |
| Open the gate | North botanical garden |
| Retail space/green grocer | Stadium |
| Community gardens are lovely | Hawthorne |
| Faculty and staff co-housing please! UBC will attract and retain high lievel people if they can see a long-term life here (like green college style, for own family space) | Stadium Neighbourhood |
| Wasted parking space (reserved spaces that are never actually used) | Marine dr res |
| Air conditing (central heating and cooling system doesn't exist, and it gets very hot inside when sunny) | Marine dr res |
| Keep hawthorn culture/flow intact | Hawthorn |
| Safety crossing SW Marine at Stadium Road to Garden | Stadium Neighbourhood |
| Reduce # of lanes | Marine dr |
| Improve public transit to Botanical Gardens | |
| Improve bike lanes to and from Hawthorn / Stadium | Stadium Neighbourhood |
| Improving parking and bike lanes | Hawthorn |
| Surface parking? Waste of space. Underground is better and housing on top | Stadium Neighbourhood |

| | |
|---|----------------------------------|
| Allow larger units for faculty rentals (3/4 bedrooms) | Hawthore place |
| Only two professor live in this building. Not anywhere close to 20%. Why not make stadium 80% faculty | 6333 Larkin |
| Street parking has become increasingly challenging. Underground parking in new neighborhood | Hawthorne / Stadium Neighborhood |
| This forest patch was a key selling point for us to purchase our unit - plesae keep it! | Rhododendron woods |
| Temporary walkways are slippery and dangerous | Gage Area |
| Improve wayfinding (entrances/lights/pathway) | Gage Near N Parkade |
| Around the bus loop too much construction, more access points to public transport | Bus loop (near nest) |
| Precedent * Washington State University Rec Centre | Athletic Core |
| Bikes and cars and buses sharing road? Really? | U Bldv |
| | |
| Works well | |
| Misc. | |
| Needs improvement | |

UNA Youth

| Map Comments | Location |
|---|-----------------------------------|
| Cleanliness of the campus | general |
| Environment is clean, schools are great, the forest, it's quiet | general |
| Closeness to bus loop' close to village, restaurants | UEL by Chancellor palce |
| Reconciliation pole! | by Forestry Building |
| Variety of facilities | Main mall or general |
| Apple fest! | Botanical gardens |
| Good when not in use for public as play space | Stadium |
| Lots of open fields for playing sports | Thunderbird Park (sports core) |
| Faster Wi-Fi | Thunderbird Park (sports core) |
| Great for games and more | Rhododendron Woods |
| Near the school close to the park area | Wesbrook |
| Contemporary building style (i.e. U Hill secondary school, Norma Rose Point School, and WCC building) | Wesbrook |
| Lots of forests | UBC Farm (forest) |
| Make possible pedestrian bridge or tunnel | W 16th by Stadium |
| Community Centre | Wesbrook |
| Environment (trees) | Pacific Spirit Park |
| Close to most ideal places to walk to. Building design 5 star! | Wesbrook |
| Clean | Wesbrook |
| Fresh Air | Wesbrook |
| Faster Wifi | Bus exchange |
| More retail stores (clothes, etc.) closest mall is far from campus | University Boulevard |
| The separate neighbourhood feeling | Changellor place |
| Expensive food, restaurants | University Marketplace |
| More restaurants! More shopping mall, more libraries around wesbrook | Wesbrook |
| Bigger skatepark | Thunderbird Boulevard (skatepark) |
| Big parking lot taking up space | Thunderbird Boulevard |
| Indoor skatepark | Stadium Neighbourhood |
| Affordability | Wesbrook |
| Need more houses! | Wesbrook |
| Works well | Needs improvement |
| Your Big Idea | |
| Garden space accessible by public to make personal gardens | |

Safety! Recently, a lot of terrible murder or crime happened. I hope UBC can set more monitors around. Moreover, we should strengthen supervision to those criminals who just released from jail. For those criminals who made serious crime, they should wear device at all time to be located.

Illumination of streets and the constant changing of the bulbs

New community centre

We should have a campus-wide app to notify people if this is something cultural happening or if there is a disaster on campus. Facebook, twitter and other social media would also bring people of campus together

More public time at rec center, or a new one

Integration of art and building creation (a public mural, street art, use UBC students as resources)

Keep the trees (#wesavetrees)

Artistic exterior that is both cool and weird

Add more basketball hoops outdoors

A building with intricate designs inside and out. Winding hallways leading to rooms for studying (Harry Potter themed)

Plant more flowers and a wider variety of trees

Creativity: sharing bicycles, in China there are many sharing bicycle companies that invest in this service. You spend around 25c to ride them. However, the problem is how to keep the bike organized and not affecting the traffic

More housing, more affordable

E-Taxi for campus: On campus only, AI-driving taxis, preferably low-cost, or motorbikes or smaller vehicle to help transport. Use phone to call/order.

Stress relief centre full of animals
